Waste & recycling

Temporary and permanent buildings for waste and recycling management.

Sorting, recycling and storage of waste

Short building time

Rapid construction and installation.

Various types of cladding

Coated membrane, corrugated steel cladding or sandwich panels.

Large floor surfaces

For optimal sorting and storage.

Relocatable

Structures for rapid relocation.

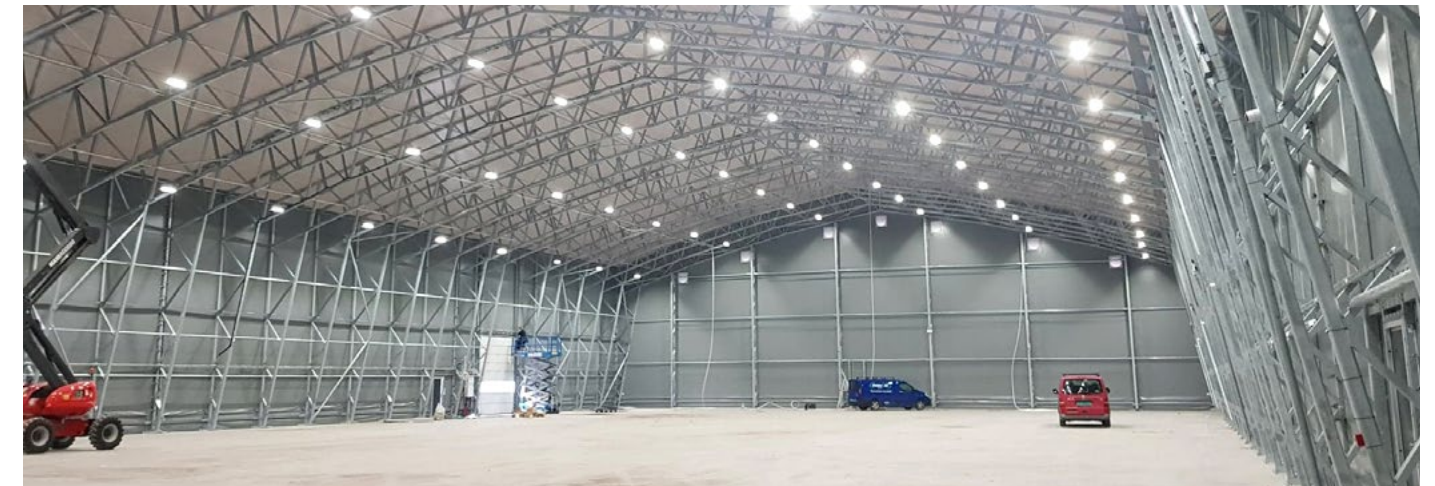

Versatile & robust structures

Designed to withstand heavy wind and snow loads.

Our waste and recycling processing facilities

can be delivered with concrete or wooden retaining side walls that are calculated appropriately for the material to be stored.

For optimal sorting and storage, the self-supporting steel frame provides large floor surfaces and high ceilings.

Side walls made of concrete or wood

Cover anything. Anywhere.

Specially designed to meet the needs of the recycling and waste management industry

Hallgruppen has an in-house engineering, construction and architecture department that enables us to offer a full turnkey service.

In most cases, these structures do not require extensive foundation and can be anchored directly to the ground.

Cover anything. Anywhere.
